www.uae-rrr.com. All Rights Reserved. Closure Unit Tests - goog.ui.ac.RotaryKnob goog.require('goog.dom'); goog.require('goog.testing.jsunit'); goog.require('goog.ui.ac.RotaryKnob'); Q: Match path of magic number in.txt file? I have a file with a few lines of text that look like: (str) some tag another tag yet another tag a 4th tag (I'll remove the HTML tags and lines because they are only there for background info). The file is quite large, so I don't want to read in the entire thing if I can help it. I want to be able to loop through the file and match the contents of the file line by line to match a set of strings. My problem is that I can't figure out how to search for the first set of strings (in the above example: some tag and another tag) yet another tag. Is there a good way to search for this? Right now I'm reading through the file in a loop, reading one line at a time and trying to 50b96ab0b6
