nice puzzle game but fixed key mapping, hard for those who only WASD like me.... I think niffles makes the best platformers out there. This one is no exception. You become attached to the character and worlds by the end. I wish he'd make a sequel to this one.. DOESN'T WORKS!.

Serious graphic issues and no way to configure the game in the right way.

Could be it's interesting but, it simply doesn't work.. There's no explosions in this game  
0/10. I loved this game. It was a lot of fun! I'm hoping to see more episodes. Get on that!

Absolutely love the works of Nifflas Nygren. I first became acquainted with his work by playing Knytt and then Knytt Stories. Saira is a highly polished version of that same ambient/exploratory gameplay that made those games so enjoyable.

Love, love, love this game. Just wish it had another story to play through.. This game is surprisingly fun. Within 30 minutes of gameplay, I found myself with a good number of planets to explore, each with a very unique feel, including Saira's outfit. The scenary is really smooth and the mostly-friendly creatures (so far) make planets feel like places, not "levels" If only I didn't get so mad from platform pit-death!. it's very fun. if you love solving puzzles, you must try it.. Was a promising title, but far too short. The full game only includes 'episode 1,' and the developer doesn't plan to finish the story. The level/campaign editor is incredibly difficult to learn and the developer offers no guides or help, so custom content is nonexistent.. i can said this game pretty nice and its free.. good puzzle game just for mine its not in a full screen... Another excellent work by Nifflas and now also free! A very momentum based platformer with many neat puzzles and photo safari space exploring. Go play this, Nifflas other free works and Knytt Underground on steam..
